

Guidelines for ALFALFA

Pre-plant Soil Application: Apply *Soil Solution* @ 24 Oz/acre. This application should be made in the Fall, and incorporated, or up to planting in the Spring. For No-till or over a growing crop, increase rate to 32 Oz/acre.

First Year Seedling Alfalfa:

Hopper Box Seed Treatment: Apply *Seed Coat* @ 2 to 3 oz (dry weight) per acre. *Seed Coat* is to be applied at a rate of 4 Oz per 50 pounds of seed as a standard rate.

Early Spring: Foliar apply *PercPlus* @ 24 Oz/acre at early growth.

Early Summer: Foliar apply *CropKarb* @ 32 Oz/acre.

Established First Year Alfalfa: Tank-Mix *CropKarb* @ 32 Oz/acre, *Calcium Plus* @ 16 Oz/acre, *Magnesium Plus* @ 8 Oz/acre.

Early Fall: Foliar apply *PercPlus* @ 16 Oz applied with *Boron Plus* @ 4 Oz/acre.

Established Alfalfa:

Early Spring: Foliar apply *PercPlus* @ 24 Oz/acre with *Boron Plus* @ 8 Oz/acre.

After Each Cutting: Apply *CropKarb* @ 32 Oz/acre.

After Final Harvest of Season: *CropKarb* @ 32 Oz/acre, *Calcium Plus* @ 32 Oz/acre, *Magnesium Plus* @ 16 Oz/acre.

NOTE: Soil or plant tissue analysis may determine the need for other nutrients in addition to, or as a substitute to these guidelines.

NOTE: *CropKarb* may be replaced with a tank-mix of *Potassium Plus* @ 32 Oz, *PercPlus* @ 8 to 16 Oz, and *Boron Plus* @ 4 Oz. *Plant Power* may be substituted for *PercPlus* and vice-versa in any application and at the same rate.

Mixing: Always dilute *Potassium Plus* in water first, and follow with other ingredients in listed order to avoid excessive foaming.

These **DeltAg Guidelines** have been utilized to improve overall crop health and are not intended to be utilized as a replacement for basic and customary fertilizer applications. **“Other Crop Specific Guidelines are available upon request.”**
