

Seed Treatments

PercPlus™

On RICE, WHEAT and SOYBEANS, **PercPlus** at a seed treatment rate of

10 ounces per 100 pounds of seed

On crops like cotton or corn with lower seeding rates, **24 ounces per 100 pounds** has proven to be an effective nutritional seed treatment rate.

Zinc Plus™

Seed treatment with **Zinc Plus** at a standard rate of

10 ounces per 100 pounds of seed

has been proven in the field by many growers and seed companies.

Zinc Plus is a source of Zinc Sulfate that has been specifically formulated for **crop response**.

Remember:

It's not what you put out, but what gets in the plant... that counts!

Combination

Many growers are utilizing a combination seed treatment with great results.

PercPlus at 10 ounces and **Zinc Plus** at 6 ounces. This combination

provides:

A Great Start for Your Crop!
