

Guidelines for ALMONDS

Soil Application: Apply *Soil Solution* @ 32 Oz/acre. This application is most effective when incorporated but may be surface applied at any time.

Juvenile Development

Transplant Water: Apply *PercPlus* @ 16 Oz/acre or dilute two (2) Oz/gal of water applied.

Seedling Foliar: After initial shock of transplant, foliar band *PercPlus* @ 8 Oz/acre followed by *PercPlus* @ 16 Oz/acre on seven to ten-day intervals, or 8 Oz/acre per week for 3 to 4 weeks through Drip Irrigation.

Mature Orchard

Budbreak (initial leafing): Drip or Foliar Application: *Zinc Plus* @ 32 Oz/acre and *PercPlus* @ 32 Oz/acre.

Post-Pollination: Drip or Foliar Application: Apply *PercPlus* @ 16 Oz/acre, *Zinc Plus* @ 32 Oz/acre & *Boron Plus* @ 4 Oz/acre.

Initial Water Stage (sizing/bulking): Drip or Foliar Apply: *CropKarb* @ 32 Oz/acre and *Boron Plus* @ 4 Oz/acre weekly. Make these applications on weekly intervals for two applications. **NOTE:** The addition of *Zinc Plus* @ 32 Oz/acre has been found very beneficial where chronic deficiencies have been observed.

Soil Applications w/ Liquid NPK: Supplemental nutrients applied with liquid fertilizers (N, P, K) based on needs.

Boron Plus: 20 Oz/acre (Crop Response Rate). Normally supplies ample boron.

Zinc Plus: 16 Oz/acre (Crop Response Rate). Increase to 32 Oz/acre when zinc is deficient in soil.

Sulfur Plus: 32 Oz/acre (Crop Response Rate). Increase to 48 Oz/acre when sulfur is deficient in soil.

Potassium Plus: 32 Oz/acre (Crop Response Rate). This is a supplemental K application.

Manganese Plus: 16 Oz/acre (Crop Response Rate). Increase to 32 Oz/acre when manganese is deficient in soil.

NOTE: *CropKarb* may be replaced with a tank-mix of *Potassium Plus* @ 32 Oz, *PercPlus* @ 8 to 16 Oz, and *Boron Plus* @ 4 Oz. *Plant Power* may be substituted for *PercPlus* and vice-versa in any application and at the same rate.

Mixing: Always dilute *Potassium Plus* in water first and follow with other ingredients in listed order to avoid excessive foaming.

These **DeltAg Guidelines** have been utilized to improve overall crop health and are not intended to be utilized as a replacement for basic and customary fertilizer applications. **“Other Crop Specific Guidelines are available upon request.”**
