

Calcium Plus™

Low Rates - High Response

SOIL/FOLIAR NUTRIENT

GUARANTEED ANALYSIS 0-0-0

Calcium (Ca) 8.00%

Derived from Calcium Nitrate
Weight per gallon: 10.87 lb at 68° F
Grams per liter: 1304 g at 20° C

GENERAL INFORMATION:

Calcium Plus is designed as a source of calcium to treat or prevent deficiencies for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops.

COMPATIBILITY:

This product is compatible with most commonly used pesticides. However, it is advisable to always check for compatibility. **NOTE:** Always follow label directions and precautionary statements on pesticide label.

APPLICATION RATES:

Soil: Broadcast Incorporated: 64 Oz/acre.

Soil: Surface Applied Broadcast: 1 gallon/acre.

Side-dress: 32 to 64 Oz/acre.

In-Furrow: 16 Oz/acre.

Foliar: 32 Oz/acre.
Apply weekly as needed.

Drip Irrigation: 0.50 Oz/1,000 sq ft weekly.

Injection (1:100): 4 Oz/gallon weekly (312 ppm).

Pump-Up Sprayer: 4 Oz/gallon of water.
Spray light mist over foliage from 3 feet away. Apply weekly as needed.

Calcium Plus™

CALCIUM & YOUR CROP

Many growers and dealers have found **Calcium Plus** to be very effective as an In-furrow or Side-dress application when soil pH is less than desirable and liming is not a current option. At **DeltAg**, we consider this application as a "Crop Response" treatment until liming can be completed.

COMMON METHODS OF USE

Calcium Plus is NOT a liquid lime, nor do we believe in any long-term use of a liquid lime. It is much more economical to apply lime when time and finances allow it.

However, we have used **Calcium Plus** many times in an effort to help get a crop out of the ground and growing when the soil acidity was a known issue with attaining a healthy seedling stand.

While there are several methods that have been employed, the best, we believe by far is that of an in-furrow application of **Calcium Plus**. This treats the area where the biggest problem presides early season, the germination zone. At **DeltAg**, we have always felt strongly that the first few weeks after emergence will determine a crop's potential.

Calcium Plus™

Chemistry... Not Fertilizer!

Calcium Plus utilizes *DeltAg's* proprietary **BioTransport System**, which improves absorption and translocation of materials throughout the plant while acting as an aid to improving nutrient efficiency. The "Plus" indicates the presence of *DeltAg's BioTransport System*. *Calcium Plus* has the ability to perform adequately at very low application rates as compared to other calcium sources.

BioTransport System

Calcium Plus contains calcium that has been blended with *DeltAg's BioTransport System*. With this chemistry *Calcium Plus* shows superior performance.

More About *Calcium Plus*

Calcium Plus is used as a soil or foliar calcium source where calcium deficiencies occur or where additional calcium is desired. Always conduct a compatibility test before any large scale

*Calcium Plus
Means Lower Cost
and Better Results*

Comparison of *Calcium Plus* to other sources of calcium has proven the superior uptake of calcium into the plant through both foliar and soil applications. A typical use rate for soil application is to apply one to two gallons per acre broadcast or apply one to two quarts in with other side-dress fertilizers. Foliar applications at one quart per acre have proven to be very effective.

Cotton Response to Calcium Sources

All data shown are results compiled for *Calcium Plus* research and are not guaranteed. Results may vary according to weather conditions.

*"IT'S NOT WHAT
YOU PUT OUT,
BUT WHAT GETS
IN THE PLANT....*

That Counts!"
