

Copper Plus®

Low Rates - High Response

SOIL/FOLIAR MICRO-NUTRIENT

GUARANTEED ANALYSIS 0-0-0

Copper (Cu) 5.00%
5.00% Water Soluble Copper (Cu)

Derived from Copper Sulfate
Weight per gallon: 9.51 lb at 68° F
Grams per liter: 1141 g at 20° C

GENERAL INFORMATION:

Copper Plus is designed as a source of copper to treat or prevent deficiencies for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops.

NOTE: **Copper Plus** is a registered fertilizer and is not intended for use as a fungicide or algicide.

APPLICATION RATES:

Soil: 24 to 32 Oz/acre.

Foliar: 16 Oz/acre.
Apply weekly as needed.

Drip Irrigation: 0.10 Oz/1,000 sq ft weekly.

Injection (1:100): 1 Oz/gallon weekly (78 ppm)

Pump-Up Sprayer: 2 Oz/gallon of water.
Spray light mist over foliage from 3 feet away. Apply weekly as needed.

COMPATIBILITY:

This product is compatible with most commonly used pesticides. However, it is advisable to always check for compatibility.

NOTE: Always follow label directions and precautionary statements on pesticide label.

Copper Plus®

FUNCTION OF COPPER

Copper plays an integral part of light reactions in all plants and is a component of many plant enzymes. Copper has a direct impact on a plant's ability to convert carbohydrates to sugars, thus impacting final color and quality.

COPPER PLUS APPLICATIONS

Copper Plus is applied late season to aid overall health of many crops such as melons, citrus, sweet potatoes and even in some commercial greenhouse applications.

NOTE: **Copper Plus** is a registered nutrient for crop production and is not formulated to be used as an algicide or as a fungicide.

Copper Plus®

Chemistry... Not Fertilizer!

Copper Plus utilizes **DeltAg's** proprietary **BioTransport Sytem**, which improves absorption and translocation of materials throughout the plant while acting as an aid to improving nutrient efficiency. The "Plus" indicates the presence of **DeltAg's BioTransport System**. **Copper Plus** has the ability to perform adequately at very low application rates as compared to other copper sources.

BioTransport[®] System

More About **Copper Plus**

Copper Plus is used as a soil or foliar copper source where copper deficiencies occur or where additional copper is desired. Always conduct a compatibility test before any large scale mixing.

**"IT'S NOT WHAT
YOU PUT OUT,
BUT WHAT GETS
IN THE PLANT....**

That Counts!"

Comparison of **Copper Plus** to other sources of copper has proven the superior uptake of copper into the plant through both foliar and soil applications. A typical use rate for soil application is to apply 24 to 32 ounces in side-dress liquid fertilizers. Foliar applications at 16 to 32 ounces have proven to be very effective.

Benefits:

Copper Plus is typically applied at rates of one-tenth ounce per 1,000 square feet for drip irrigation treatments and may also be injected at ultra low rates for commercial operations such as greenhouse or vegetable production.

CROP QUALITY

Copper Plus has been utilized on many acres of crops such as melons, citrus and even sweet potatoes to improve final quality with applications being made in the weeks before final maturity.

COMPATIBILITY

Copper Plus has been tank mixed with many different fungicides and other pesticides. Always check for compatibility.

COPPER PLUS VERSATILITY

- In-furrow with Seed
- Seedling Foliar
- Side-Dressed
- Injection
- Drip
- Fertigation
- Impregnation
