

# Defoliation Studies 2000

## University of Arkansas Clarkdale, AR

**Procedure:** A tank mix of Def at 1 to 8 and Drop at 1 to 32 in a ten gallon volume was applied at 65% Open Boll on September 14, 2000. The **DeltAg** products were added to this same tank mix for defoliation enhancement effects and evaluated based on observations only.

Weather Conditions: Sunny, 92° F and 80% Humidity

This test was designed with standard replications and for observations only.  
No yield data was taken.
