

DeltAg Dribble Banded to Side** ON CORN, 2011

** Applied at Planting - Stream Bar Dribbled
in a Band to the side of the row.

Paul Counce, PhD Rice Specialist
University of Arkansas Rice Branch Experiment Station
Stuttgart, Arkansas

NOTE: Original plan was for Tissue Analysis which was not completed. Yield data is somewhat suspect because all corn lodged and had to be hand harvested rather than research machine harvested to obtain results. Therefore, this data might not be a true representation of actual field results when machine harvested.
