

Potassium Plus[®]

*Low Rates
High Response*

SOIL/FOLIAR NUTRIENT

GUARANTEED ANALYSIS 0-0-28

Soluble Potash (K₂O) 28.00%

Derived from Potassium Carbonate
Weight per gallon: 11.86 lb at 68° F
Grams per liter: 1423 g at 20° C

GENERAL INFORMATION: *Potassium Plus* is designed as a supplemental source of potassium to treat or prevent deficiencies for all field, row, vegetable, fruit, tree, vine, ornamental and turf crops.

COMPATIBILITY:

This product is compatible with most commonly used fertilizers. However, it is advisable to always check for compatibility. **NOTE:** Always follow label directions and precautionary statements on pesticide label.

APPLICATION RATES:

Soil: Broadcast Incorporated: 64 Oz/acre.

Soil: Surface Applied: Not Recommended.

Side-dress: 32 to 64 Oz/acre.

In-Furrow: Not Recommended.

Foliar: 32 Oz/acre. Apply weekly as needed.

Drip Irrigation: 0.50 Oz/1,000 sq ft weekly.

Injection (1:100): 4 Oz/gallon weekly (312 ppm).

Pump-Up Sprayer: 4 Oz/gallon of water.

Spray light mist over foliage from 3 feet away. Apply weekly as needed.

NOTE: It is advisable to dilute *Potassium Plus* in water prior to adding pesticides or other nutrients to avoid excessive foaming.

*For More Information Please Contact *DeltAg*.

POTASSIUM & YOUR CROP

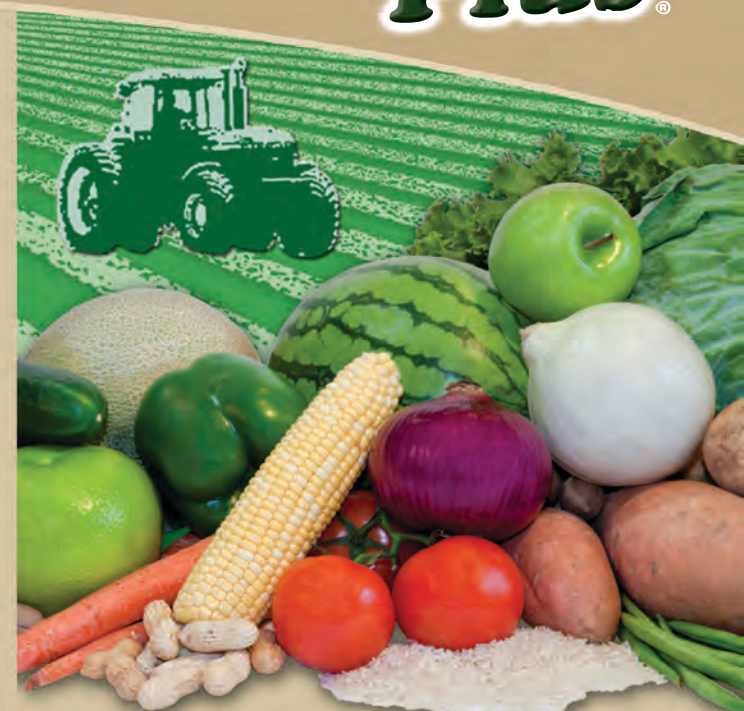

At Sizing or Bulking: As a crop reaches peak bloom, or as the maturing crop starts to 'size' or fill out, there is a tremendous demand for cations, particularly potassium. This phase of crop development is described by many as "bulking". Research on many crops throughout the region has shown that supplemental potassium as a foliar spray or side dress can be very economical with proper timing.

At *DeltAg*, we developed *Potassium Plus* specifically for that purpose. After many years of "on farm" research and development, and now several years of University studies, *Potassium Plus* has become known as a premier source material for foliar potassium.

COMMON METHODS OF USE

With *Potassium Plus*, side-dress applications have proven to be very effective on many crops in varied soils. Many times, there is ample potassium if the crop could somehow find a way to access it. We see too many potassium deficiency symptoms when the soil test says potassium is optimum or ample. *Potassium Plus* was not designed to furnish all the K your crop needs, but to aid the crop in its ability to more efficiently utilize the K that is in the soil.

Potassium Plus®

Chemistry... Not Fertilizer!

Potassium Plus: Soil and Foliar Nutrient

Potassium Plus utilizes **DeltAg's** proprietary **BioTransport System**, which improves absorption and translocation of materials throughout the plant while acting as an aid to improving nutrient efficiency. The "Plus" indicates the presence of **DeltAg's BioTransport System**. **Potassium Plus** is a great addition to side-dress liquids, aiding the availability of residual potassium, providing plants with a form of potash ideally suited for fruiting.

BioTransport System

Benefits of Late Season Application

Potassium Plus applied timely has proven to be very beneficial as a foliar at a 32 ounces per acre rate, applied twice during heavy fruiting.

Applying **Potassium Plus** is a very important step in reaching your crops full potential, providing additional potassium to supplement the crop. Adding **Potassium Plus** can also help your crop to withstand diverse late season conditions.

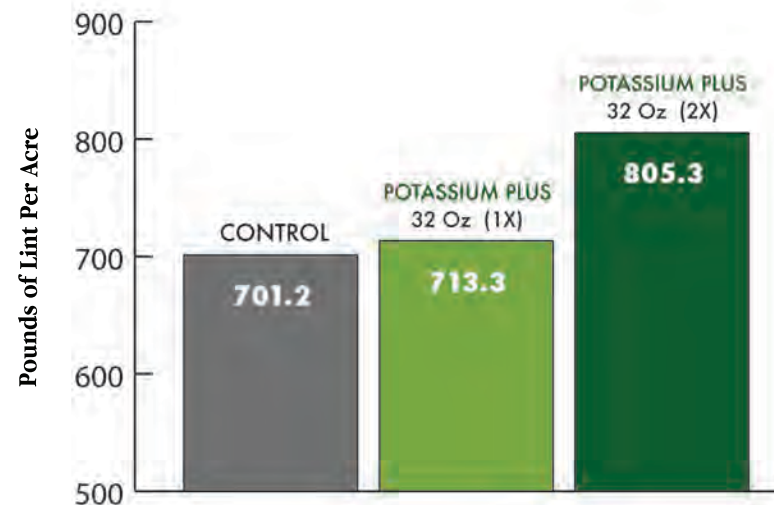

Potassium Plus has been tank mixed with many pesticides; however, always check for compatibility. **Potassium Plus**, applied mid to late season, has been shown to enhance crop tolerance to drought conditions. It is often applied with fungicides.

Proven Results:

Look at the data below and study the results closely. These results, compiled at the Keiser Research Facility in Arkansas, are plot averages. The 104.1 pounds per acre average is a substantial yield increase and worthy of your close attention. Two applications of **Potassium Plus** is very economical. Do the math and you will find that **Potassium Plus** yielded almost 10 times the return on your money.
